*"I was encouraged by my master's supervisor to become a member in order to present my research at the 2008 Annual Meeting. Because of its more "intimate" setting, the whole meeting, especially the Awards Banquet, was the perfect opportunity for networking. There were attendants from industry, academia and government. I was introduced by my supervisor to many of his colleagues including government officials. These networking opportunities helped me to meet the right people which ultimately led to a job."*
